

**AMENDMENT TO THE SPECIFICATION**

Specification page 40, line 28 and paragraph continuing to page 41, line 4 has a correction made below. The word –Velcro – now is corrected to read with a registration mark. It now reads –VELCRO®–.

Turning, now, to Figs. 28-32, illustrated are several alternate embodiments of dual retention mechanisms for the various embodiments of systems 700 etc. disclosed herein. The dual retention system illustrated in Figs. 28-32 include a magnetic retention mechanism of the various types described above, or some other retention mechanism that works based on contact or proximity, e.g., as ~~Velcro~~ VELCRO® fasteners, magnets or the like. Additionally, the dual retention system of Figs. 28-32 includes a latching mechanism similar to that illustrated in and described with respect to the latching mechanism 510 of Fig. 15.
